Women's
90°
Cut

This picture is an example of how the 90° cut should be styled. It is expected that the style resemble the picture above. Brushes and irons cannot be used to achieve this look, only fingers and a blow dryer. The length of the cut will be determined by the competitor in order to create uniform layers. Do not waste time point cutting or texturizing...concentrate on the technique of the 90-degree haircut.
